

SHAIK ROOHI NAAZ

Chittoor, AP | +91 88854 73205 | shaikroohi147@gmail.com

Profile Summary

Integrated M.Tech Software Engineering student at VIT (CGPA: 9.32/10) with hands-on experience in **Artificial Intelligence, Machine Learning, Full Stack Development, and REST API development**. Skilled in building scalable web applications using **React.js, Node.js, Python**, and developing AI solutions using **Scikit-learn, XGBoost, LightGBM, and Explainable AI (SHAP)**. Passionate about solving real-world problems through intelligent software systems, clean architecture, and modern web technologies.

Skills

Programming: Python, Java, C, C++, JavaScript

Frontend: HTML5, CSS3, React.js

Backend: Node.js, Express.js, REST APIs

Machine Learning: Scikit-learn, XGBoost, LightGBM, Random Forest, SVM, Neural Networks

Data Science: Pandas, NumPy, Matplotlib, Data Preprocessing, Feature Engineering, EDA, PCA, SHAP

Database: SQL

Tools: Git, GitHub, Jupyter Notebook, Google Colab

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Software Engineering

Soft Skills: Communication, Team Collaboration, Problem Solving, Critical Thinking, Time Management

Education

Integrated MTech (Software Engineering)

Vellore Institute of Technology, Tamil Nadu | 2023-Present

Intermediate (Class XII) – General Stream

Sai Sri Chaitanya Junior College, Palamaner, Chittoor | 2021-2023

CGPA: 9.32/10

Percentage:

97.7%

Projects

NeuroLearnAI – Intelligent Study Pattern & Burnout Prediction System

- Developed an AI-based system to predict student burnout using machine learning models and behavioral data. Improved model interpretability with SHAP explain ability and data-driven insights.

Crop Yield Prediction Platform

- Built a machine learning application to predict crop yield using environmental and agricultural data. Performed data preprocessing, feature engineering, and model evaluation to improve prediction accuracy.

Breast Cancer Prediction System

- Designed a machine learning model to predict breast cancer using clinical and gene expression datasets. Applied feature selection and dimensionality reduction to enhance classification performance.

Blockchain-Based Industrial Fire & Chemical Leak Monitoring System

- Developed an IoT-enabled monitoring system with Node.js backend and Ethereum blockchain for secure real-time hazard detection. Integrated REST APIs and smart contracts for automated incident logging and tamper-proof monitoring.

Certifications:

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Google AI Essentials
- Google Prompting Essentials
- Yuva AI for All – NASSCOM FutureSkills Prime
